Propylene Glycol:

The Propylene Glycol that used in our flavour products is neither produced from, nor does it contain any plant or animal products or by products. It is from Synthetic Source. Propylene oxide and water are the raw materials used for the production of Propylene Glycol. Propylene oxide is produced utilizing petroleum or inorganic derived raw materials. The water used is obtained from steam condensation.

The above statement applies to ALL Propylene Glycol used as a carrier in flavour products by Wonder Flavours.

Wonder Flavours Inc.

A handwritten signature in black ink, reading "J. Engl", written over a horizontal line.
